[Minimizing Weight Gain While Maximizing Strength When ...](#)

- The next key is application of the glue itself o FOR CA, the biggest sin most students commit is to apply glue directly from the bottle This is where its reputation of excessive weight comes from Using the bottle it is impossible to apply less than a full drop, and even a small drop is WAY too much for most joints in SO structures

[HOURGLASS MOUNTAIN DULCIMER KIT Assembly Instructions](#)

Too little glue may cause the parts to separate later, whereas too much glue makes things messy Always keep a damp rag handy for quick cleanup, as necessary It is especially helpful to keep your fingers clean while gluing, because gluey fingerprints have the embarrassing tendency to appear on the

Hurdy Gurdy - Harp Kit

When gluing parts together, be sure to put enough glue on the joint to wet the entire surfaces to be joined A good sign of proper gluing is that a little excess will squeeze out around the joint when clamping pressure is applied Too little glue may cause the parts to separate later, whereas too much glue ...

Troubleshooting delamination issues on the corrugator

A white glue line (right) generally means there's not enough heat, but can also be caused by too much heat When the glue line is white and smooth to the touch, it means there either isn't enough heat at the machine or the gel temperature is too high, thus letting the starch dry but not gel When this appears the gel temperature needs

APPLICATION: TIPS: GLUING INSTRUCTIONS FOR STABOND

MIXING GLUE: We chose 2 part glue because it has a faster set up time and a much stronger adhesion Glue mixing is required Stabond UK-148 consists of both a resin (clear in can) and an activator (brown in bottle) TIPS: • When humidity is over 55%, DO NOT attempt to glue Apply glue indoors for best results
